Properly size images

Serve images that are appropriately-sized to save cellular data and improve load time. Learn how to size images. FCP LCP

Defer offscreen images

Consider lazy-loading offscreen and hidden images after all critical resources have finished loading to lower time to interactive. <u>Learn how to defer offscreen images</u>. FCP (LCP)

Minify CSS ^
Minifying CSS files can reduce network payload sizes. <u>Learn how to minify CSS</u> . FCP <u>LCP</u>
Efficiently encode images
Optimized images load faster and consume less cellular data. <u>Learn how to efficiently encode images</u> . FCP [LCP]
Serve images in next-gen formats
Image formats like WebP and AVIF often provide better compression than PNG or JPEG, which means faster downloads and less data consumption. Learn more about modern image formats. FCP LCP
Preconnect to required origins
Consider adding preconnect or dns-prefetch resource hints to establish early connections to important third-party origins. Learn how to preconnect to required origins. LCP FCP
Initial server response time was short — Root document took 0 ms
Keep the server response time for the main document short because all other requests depend on it. <u>Learn more about the Time to First Byte metric</u> . FCP LCP
URL Time Spent
127.0.0.1 1st Party 0 ms
/index.html (127.0.0.1) 0 ms
Avoid multiple page redirects
Redirects introduce additional delays before the page can be loaded. <u>Learn how to avoid page redirects</u> . <u>LCP</u> <u>FCP</u>
Use HTTP/2
HTTP/2 offers many benefits over HTTP/1.1, including binary headers and multiplexing. <u>Learn more about HTTP/2</u> . <u>LCP</u> <u>FCP</u>
Use video formats for animated content
Large GIFs are inefficient for delivering animated content. Consider using MPEG4/WebM videos for animations and PNG/WebP for static images instead of GIF to save network bytes. Learn more about efficient video formats FCP LCP

Remove large, duplicate JavaScript modules from bundles to reduce unnecessary bytes consumed by network activity. FCP LCP

## Preload Largest Contentful Paint image

If the LCP element is dynamically added to the page, you should preload the image in order to improve LCP. <u>Learn more about preloading LCP elements</u>. <u>LCP</u>

Avoids enormous network payloads — Total size was 262 KiB

Large network payloads cost users real money and are highly correlated with long load times. <u>Learn how to reduce payload sizes</u>.

# Accessibility

These checks highlight opportunities to <u>improve the accessibility of your web app</u>. Automatic detection can only detect a subset of issues and does not guarantee the accessibility of your web app, so <u>manual testing</u> is also encouraged.

#### ARIA

ARIA input fields do not have accessible names

When an input field doesn't have an accessible name, screen readers announce it with a generic name, making it unusable for users who rely on screen readers. Learn more about input field labels.

Failing Elements

span#state-button.ui-selectmenu-button.ui-selectmenu-button-closed.ui-corner-all.ui-button.ui-widget

span#department-button.ui-selectmenu-button.ui-selectmenu-button-closed.ui-corner-all.ui-button.u...

These are opportunities to improve the usage of ARIA in your application which may enhance the experience for users of assistive technology, like a screen reader.

#### INTERNATIONALIZATION AND LOCALIZATION

▲ <html> element does not have a [lang] attribute

If a page doesn't specify a lang attribute, a screen reader assumes that the page is in the default language that the user chose when setting up the screen reader. If the page isn't actually in the default language, then the screen reader might not announce the page's text correctly. <u>Learn more about the lang attribute</u>.

Failing Elements
